

Logging in to Schoolwise

In order to login to Schoolwise the student must first be logged in to their school email account. The student emails are hosted by Google.

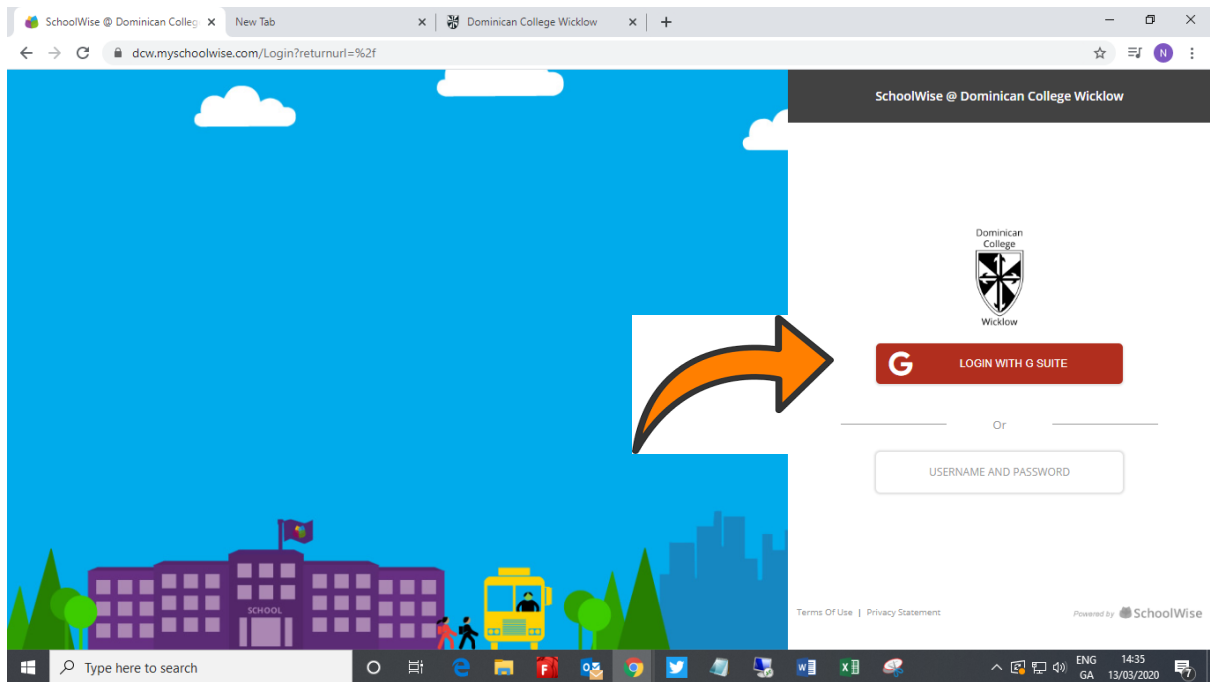

If a student has more than 1 google account, they need to be sure that they are logged in to their school email.

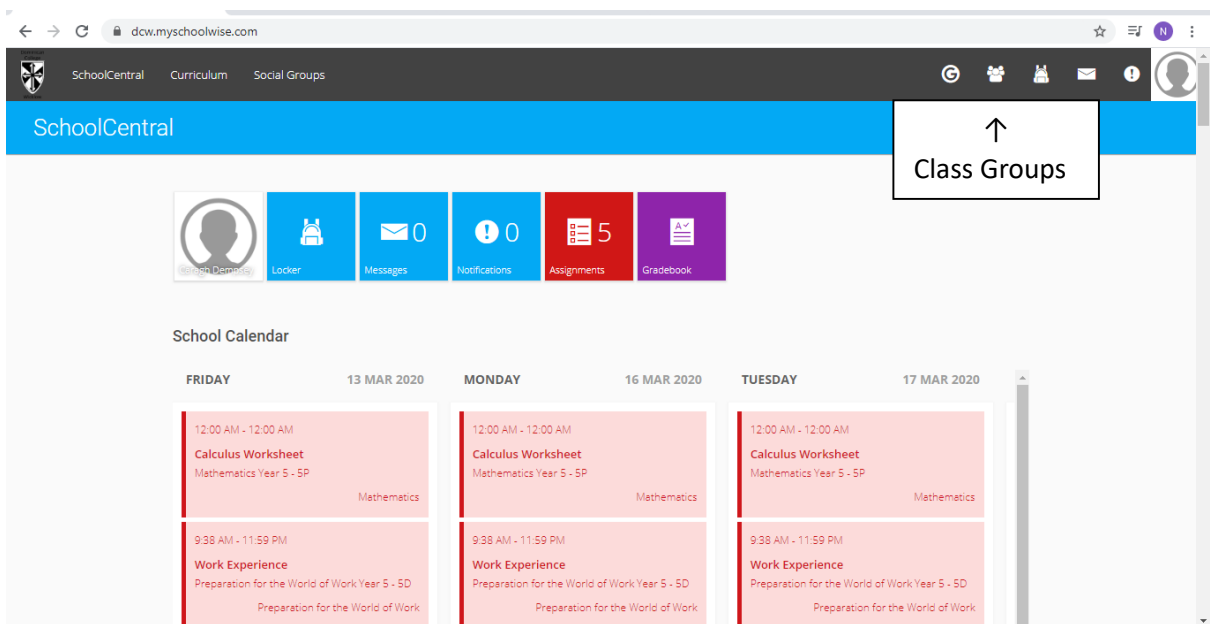

At the bottom of the school webpage is a Schoolwise icon.

Click on this and you will be brought to the Schoolwise login page. On this page students need to click on the red login with G Suite button.

This will bring students to their Schoolwise home page. Where they can see if they have any new messages, notifications or assignments.

From here students can navigate to their class groups, send messages, check their calendar and assignments using the appropriate tabs.
